

## SARKAR LEVEL IIIA PASGT HELMET

Introducing the SDH-01 Level IIIA Ballistic Helmet from Sarkar Defence Solutions.

Comprising of a lightweight shell with ultra comfortable webbing and four point harness system, our helmets offer fantastic comfort while providing world class reliability and protection.

Constructed of Kevlar® or Spectra composite materials we can consistently meet or exceed 2,150 fps (655 MPS) V50 Ballistic Test Data when measured against a MIL-STD-662E which requires a minimum of 2,000 fps (609 Mps). It is one of the finest armour head-gear for protection from exploding shrapnel and fragmentation. The ergonomically engineered design is lightweight and has ideal distribution of mass over the head centreline. This results in a minimum

moment of inertia, and therefore no lag in following head movement. Available in standard olive green and other customer customisable colours, we also provide cloth helmet covers if required. The two-component polyurethane paint allows decontamination after exposure to liquid chemical agents. We can also provide a fire and flame proof coating on our helmets that can resist temperatures up to 320° F or 106° C continuously for 30 minutes.

We also offer boltless helmets that offer a single mould design with no weak points.

**Specifications:**

- Manufactured strictly as per US Military PASGT shape and style.
- Ballistic shell made of Kevlar composite.
- Optimum coverage of 175 sq. inches (1129 sq. cm for medium size.)
- Two-component polyurethane paint allows decontamination after exposure to chemical agents.
- Full frontal protection.
- Ideal mass distribution minimizes lag during head movement.
- Minimum ½” stand off from the head in all directions for ventilation and better ballistic protection capabilities
- Certified V50 of up to 640 m/s
- Boltless design available offering maximum protection and no weak points
- Three/Four point harness
- Unique USMC LWH style head mesh and fastening system
- NIJ Level IIIA and certified V50 – Tested by NIJ accredited United States Test Labs.
- NATO Codified
- 10 years warranty
- All colours available
- Helmet Covers available
- Optional Level IIIA Visor for maximum face protection
- Designed specially to accommodate Night Vision Systems and Communication Devices
- Other helmet styles available including, Air Crew, Special Forces Combat, Pilot, Tank etc.

Protection is our passion. Performance our guarantee

*The pictures on the left show one helmet that has been shot on three sides by 9mm bullets.*

*From the photos it is clear that there have been no penetrations and furthermore the damage to the helmet is minimal.*

---

Build from the foundation of real life battle field experience and state of the art technology; we have designed our helmets to offer the user total peace of mind while at the same time offering unparalleled levels of comfort.

At SARKAR our mission is not only to meet the specifications but to exceed them every time.

While offering the best price we also deliver the highest value.
